RE: DENCO Construction Specialists

DENCO provided me with more value than I could ever imagine! When I first met the DENCO team, I had plans that they city refused to give me a permit for and estimates that were way higher than my budget.

DENCO's Design-Build team value-engineered my ground-up project shaving more than 30% off the cost. At the same time, their expertise in business operations help me better define my concept and refined the building design to better meet the needs of my customers and me.

DENCO's seamless team-approach helped me transition from my old building to a beautiful new home for my business. I am truly indebted to DENCO for all of their assistance. Their value, coordination, communication and willingness to go the extra mile are beyond comparison.

The DENCO team is now part of my family as I know I am part of the DENCO family. I would recommend DENCO to any business owner looking to build.

Sincerely,

Kawa Tahasilah
